5+ HOURS SAVED **FROM** REPETITIVE **TASKS** PER WEEK**

THE ROI IS REAL***

"We were ready to hire another PM before we adopted Kinetech. Our efficiency increased so much that we were comfortably able to defer the need for a new person for almost 6 months now.

In terms of ROI, Kinetech has already paid for itself multiple times over."

⚠ 1000+ DEFICIENCIES

IDENTIFIED > SUBMITTED > AUTHORIZED > INSTALLED

On any construction project, deficiencies are inevitable. Whether the cause is a missed order, damaged product, short-shipped delivery or a warranty call, Kinetech PM is here to streamline the re-ordering process and ensure your team delivers the best customer service possible in the shortest amount of time. Now that's ROI!

DON'T LEAVE YOUR SCHEDULE UP TO CHANCE

While every Project Manager may have their own timeline for managing a project, Kinetech PM gives your management team the ability to aggregate this information to gain a clear picture of how your portfolio of business (and team) is performing. As your team identifies and tracks issues you'll get updates in real-time. Our analytics will then allow you to understand where your business is excelling and where there is room for improvement.
