AUTOMATOR

Automate Your Test Certification Process

AI-powered MTR automation that turns hours of checks into seconds with **99%+ accuracy.**

Ingest → Validate → Results → Predict

Automator replaces manual MTR reviews with a fast, consistent, and predictive workflow; freeing teams from paperwork, reducing errors, and helping prevent issues before they start.

⚡ **Save Time & Labor**

Up to 98% less manual effort; certificates processed in seconds.

✔️ **Improve Accuracy**

99%+ data extraction and consistent checks reduce escapes.

📊 **Gain Insight & Predict Risk**

Supplier trends, drift detection, and ML-based early warnings.

🔗 **Integrate & Scale**

Email/folders/QMS/ERP; multi-site, multi-standard, multi-format.

Why It Matters

Kinetech estimates **100,000 MTRs/year** at ~**6 minutes** each ≈ **10,000 hours** of manual review.

At an illustrative **$50/hour,** that's ~**$500K/year** in clerical effort alone.

Automator is designed to reduce manual effort by **up to 98%,** automate validation to standards, and shorten audit prep, compounding savings **with earlier detection and faster release of incoming materials.**

🔢 *Ask us to calculate your expected savings.*
