

Quality Reimagined

Explore our comprehensive suite of solutions for quality organizations

Kinotech offers a **comprehensive suite of Quality Management solutions for manufacturers committed to standing out from the pack.** Our industry leading partners AWS, Siemens, and SAP ensures your organization is at the cutting edge of new technologies like ML, AI, and more.

Why Kinotech:

- ✓ **Built for You**
Our fully customizable solutions mitigates many of the risk associated with "off-the-shelf" software solutions.
- ✓ **Rapid Delivery**
Get up and running in days to weeks.
- ✓ **Composable:**
Pick and choose the right tools for your needs and integrate to existing systems.

All Kinotech solutions are customizable to fit your processes, and may integrate seamlessly with your existing QMS and ERP. Together we will automate and digitize your quality organization to provide you a competitive advantage over your peers.

Collaboration Portal
A centralized portal for communication and collaboration with you suppliers to share KPIs, contracts, and more.

Quality Prediction
Machine learning powered solution to forecast outcomes in real-time during production.

Supplier & Audit Checklists
Create any type checklists for audit, maintenance, safety, and more from a single application.

Visual Inspections
Visually capture, identify, compare, contextualize and assess product quality using any device.

Material Test Report Automation
End-to-end automation of MTR processing with supplier performance insights and outcome prediction.

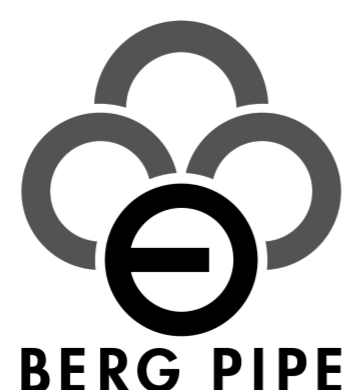

Tooling
Consolidate all facilities into a single solution to manage your tool inventory, along with calibration and verification schedules, and processes.

Transform Quality Through Digital Automation
